

The Player Tracker

24 players · season index history · MVP race

Handicaps come from the Squabbit app and get verified against posted rounds — the annual sandbagging audit is a tradition of its own. Indexes below are tracked across the season; strokes (“dots”) are allocated per round off the low man. **Every player, every year, on the record.**

MVP race: Joey ran away with it at 38 points — a 14-index playing to single digits all weekend. Index history is the referee: his start-of-season 14.4 is now an 11.9, and next April the dots get reallocated accordingly. Justice, delayed but certain.

Fair fights are engineered, not hoped for — the tracker keeps every handicap honest.
